

NEAXMail® AD-64

Unified Messaging...
Power to the People

Versatility

The foundation for a powerful unified communications solution begins with the NEAXMail AD-64, NEC's new Windows® 2000-based unified messaging system.

A foundation for the future

Built upon the Windows 2000 server platform, the NEAXMail AD-64 provides a foundation for future growth and customization. It leverages the power, reliability and scalability of the Microsoft Windows 2000 operating

system to seamlessly support many powerful third party applications in the future, such as text-to-speech, speech recognition and NEC's IP integrations.

The freedom of a single mailbox

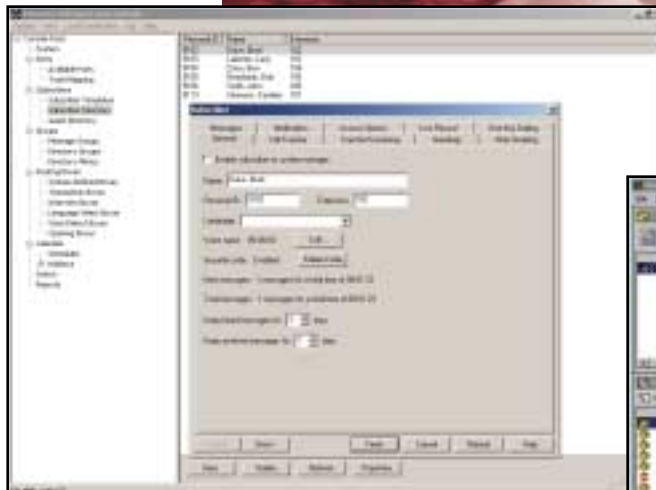

Advanced unified messaging, voice mail and automated attendant functionality can help your organization become more responsive. Through its optional suite of unified messaging and desktop call applications, NEAXMail AD-64 provides a complete and affordable unified communications solution.

These unified communication applications integrate the NEAXMail AD-64 with your LAN to give you control over live telephone traffic and messages – voice, fax and e-mail – all from your desktop PC. ViewMail® for Microsoft Messaging, for example, gives you access to your messages from your Outlook® Inbox. ViewCall® Plus lets you handle your live telephone traffic from your PC and also works with the applications you use every day such as your Outlook contact list and your Access database.

Intuitive system administration

By using the new Windows-based system administration console, the NEAXMail AD-64 can be administered from any Windows PC on your LAN. This new console is intuitively designed and is accessible via an IP connection for efficient system administration. The Windows 2000 server provides many of the disk maintenance utilities you already know, eliminating the need to learn new software interfaces.

New Windows-based Administration Console

Exciting Key Features

ViewMail and ViewMail for Microsoft Messaging

Optional ViewMail and ViewMail for Microsoft Messaging unified messaging applications allow you to visually manage your messages using your desktop PC. Organize and sort messages on screen in any order and see details about them at a glance.

ViewCall® Plus

ViewCall Plus call control application gives you total control over your incoming and outgoing telephone traffic by managing calls on a PC via a Windows graphical user interface. Dial, answer, transfer, hold, screen and even conduct conference calls with the click of a mouse.

Live Record

Allows the subscriber to record incoming calls at any point during the call and save the recording to personal mailbox or forward it to another subscriber.

Use ViewCall Plus to manage live telephone calls from your desktop

Mailbox Manager

New graphical user interface gives NEAXMail AD-64 users ability to configure and control personal mailbox settings via the desktop PC in addition to the Telephone User Interface. With this new tool, NEAXMail AD-64 users may modify greetings, security code, notifications, groups, conversation preferences and much more from their desktop.

Advanced Automated Attendant

Answer and route incoming calls automatically allowing the receptionist to give better personal service to callers who need it most. Callers can reach a subscriber directly by dialing the extension number during the opening greeting.

Customizable Voice Prompts

All prompts may be re-recorded on site, personalizing the first point of contact with the customer.

Multilingual Prompt Sets

Choose from a variety of prompt sets, including UK English, Australian English, Spanish, German and French to meet the language needs of your employees and customers.

Unlimited Customization

Using NEAXMail AD-64 routing boxes, an unlimited number of menus can be created to best suit the needs of your business. Route callers to different departments, submenus, interview boxes or play detailed audio text messages.

Intuitive and Intelligent Telephone User Interfaces

Multiple conversational interfaces give both first time and experienced users immediate access to NEAXMail AD-64 via the telephone. Using the "1 for Yes and 2 for No" options, you can access all functions by responding to simple questions. To quickly jump to specific options or features using the numbered keypad, the Menu Mode conversation is a powerful and flexible option.

Easy Maintenance

The NEAXMail AD-64 is easy to maintain. All hardware requires minimal maintenance and software is easy to both back up and restore. The administration console is intuitive and accessible via the LAN. A Status Monitor utility monitors the voice messaging system as it answers and routes calls displaying any error messages for ports. On-

line reports detail all the system information regarding incoming calls, system structure, subscriber enrollment, extension lists, message groups, busy ports, call logs and error logs. Remote maintenance provides support without the need for an on-site visit.

Full Digital Integration

Customized digital integration to your NEC telephone system provides accurate message taking, reliable message lamp control and message delivery. This also makes the NEAXMail AD-64 easy to install and maintain. With digital integration, speed and accuracy is a fundamental feature. The NEAXMail AD-64 saves time by directly connecting you to your mailbox to retrieve messages instead of requiring you to access a main call processing system first. Digital integration simplifies and enhances the entire voice messaging process, combining messaging functions into one comprehensive voice processing system.

STANDARD FEATURES
